

# RISKIFY - Safe Work Method Statement

## Project Information

Project Name: Professional SWMSprint Test

Trade Type: Tiling

Address: Professional Building Site

Job Number: PROF-2025-001

## Personnel Information

Principal Contractor: Professional Construction Co

Project Manager: John Professional

Site Supervisor: Jane Safety

SWMS Creator: Mike Expert

## Work Activities & Risk Assessment

### 1. Surface Preparation and Assessment

Description: Professional assessment and preparation of bathroom surfaces for high-quality ceramic tile installation

Hazards:

- Chemical exposure from cleaning agents and adhesive removers

Control Measures:

- Use appropriate chemical-resistant gloves
- Ensure adequate ventilation
- Follow MSDS guidelines
- Use eye protection

- Manual handling injuries from heavy tiles and equipment

Control Measures:

- Use proper lifting techniques
- Team lift for items over 23kg
- Take regular breaks
- Use mechanical aids where possible

Risk Score: 8/20

### 2. Tile Installation and Finishing

Description: Precision installation of ceramic tiles using professional adhesive systems and grouting

Hazards:

- Cuts from tile cutting equipment and broken tiles

Control Measures:

- Use guards on cutting equipment
- Wear cut-resistant gloves
- Clear work area of debris
- Proper waste disposal

Risk Score: 6/20

## Personal Protective Equipment (PPE)

- Hard hat
- Safety glasses
- Cut-resistant gloves
- Non-slip footwear

- Dust mask
- Knee pads

## Plant & Equipment Register

- Professional tile cutter  
Risk Level: Medium
- Mixing paddle and drill  
Risk Level: Low
