

SAFE WORK METHOD STATEMENT

Project: High-Rise Electrical Installation - Southbank Tower Location: 456 Southbank Boulevard, Southbank VIC 3006

Document ID: SWMS-141-1750227859346

Date: 18/06/2025

PROJECT INFORMATION

Principal Contractor: Elite Construction Management

Project Name: High-Rise Electrical Installation - Southbank Tower

Project Address: 456 Southbank Boulevard, Southbank VIC 3006

Document Type: Safe Work Method Statement

Trade Type: Electrical

Document Version: 1.0

EMERGENCY PROCEDURES

Emergency Contact: Site Supervisor

Mobile Number: Not Specified

Hospital: Nearest Hospital

Assembly Point: Main Entrance

Fire Wardens: As Designated

Spill Kits: Located at Site Office

CONSTRUCTION CONTROL RISK MATRIX

A - QUALITATIVE SCALE

Extreme Fatality, significant disability, catastrophic property damage

High Minor amputation, minor permanent disability, moderate property damage

Medium Minor injury resulting in an Loss Time Injury or Medically Treated Injury

Low First Aid Treatment with no lost time

C - LIKELIHOOD vs CONSEQUENCE

B - QUANTITATIVE SCALE

\$50,000+ Likely - Monthly in the industry, Good chance

\$15,000-\$50,000 Possible - Yearly in the industry, Even chance

\$1,000-\$15,000 Unlikely - Every 10 years in the industry, Low chance

\$0-\$1,000 Very Rarely - Once in a lifetime in the industry, Practically no chance

D-RISK SCORING

 16-18 Severe (E)
 Action now

 11-15 High (H)
 Action 24hrs

 7-10 Medium (M)
 Action 1 week

 1-6 Low (L)
 Monitor

WORK ACTIVITIES & RISK ASSESSMENT

Activity	Hazards	Initial Risk	Control Measures	Residual Risk
Cable tray installation on levels 15-20	Falls from height during work activities, Manual handling of heavy cable trays, Electrical hazards from live circuits	H (16)	Safety harness with dual lanyards required, Use mechanical lifting aids, Lockout/tagout procedures before work	L (4)
Main switchboard upgrades and electrical panel work	Electrical shock from live components, Manual handling injuries from heavy equipment, Arc flash potential	H (15)	De-energize circuits before work, Use insulated tools and PPE, Mechanical lifting aids for panels	L (3)
Lighting circuit installation throughout building	Falls from height using ladders, Electrical shock hazards, Eye strain from poor lighting	M (12)	Scaffold access platforms, Test circuits before touching, Adequate temporary lighting	L (2)
Emergency lighting system testing and commissioning	Working in low light conditions, Electrical testing hazards, Falls during emergency testing	M (9)	Portable lighting during tests, Qualified electrical testing personnel, Fall protection systems	L (2)
Power distribution panel installation in plant rooms	Heavy lifting of electrical panels, Electrical shock from terminations, Confined space work	Н (15)	Crane assistance for heavy panels, Lockout/tagout procedures, Confined space permits and monitoring	L (3)
Fire alarm system wiring and device installation	Working at height in ceiling voids, Electrical connections, Asbestos exposure in old buildings	M (10)	Mobile scaffolding for ceiling work, Qualified fire system technicians, Asbestos assessment before work	L (2)

WORK ACTIVITIES & RISK ASSESSMENT (CONTINUED)

Activity	Hazards	Initial Risk	Control Measures	Residual Risk
Underground cable installation and trenching work	Cave-in from trenching, Underground utilities strike, Manual handling of cables	H (14)	Dial before you dig, Trench shoring systems, Cable pulling equipment and proper lifting techniques	M (6)
High voltage switchgear installation and testing	High voltage electrical hazards, Arc flash incidents, Heavy equipment handling	E (18)	Qualified HV electricians only, Arc flash PPE and face shields, Crane lifting for switchgear	M (8)
